2 Inserto Metallizzato finitura Titanio o Rame su scrivanie e complementi

L'inserto Metallizzato crea un contrasto materico e cromatico che spezza il ritmo delle linee di forte spessore caratteristiche del programma; in tutti i mobili questo elemento è stato progettato per accompagnare esteticamente le varie composizioni in un progetto sartoriale, restituendo un immagine minimale e raffinata allo stesso tempo.

Titanium or Copper finish metallic insert on desks and furnishings. The Metallic insert creates a textured and chromatic contrast that breaks the rhythm of the extra-thick silhouettes, the distinguishing trait of this collection; in all furniture, this element has been designed to match the styling of the various compositions in a tailor-made design, lending the whole a minimal and concurrently sophisticated look.

Metallisierte Einsätze in Titan- oder Kupferoptik für Schreibtische und Ergänzungsmöbel. Die metallisierten Einsätze stehen materiell und farblich in elegantem Kontrast zum Korpus der Möbel und lockern damit optisch die für das Programm charakteristischen breiten Platten auf. Die sorgfältig gearbeiteten Elemente verleihen den verschiedenen Möbeln der Linie zugleich ein einheitliches Design und einen minimalistischen, aber raffinierten Look.

Insert métallisé finition titane ou cuivre sur les bureaux et les meubles d'appoint. L'insert métallisé crée un contraste de matière et de ton qui brise le rythme des lignes très épaisses caractéristiques du programme ; dans tous les meubles cet élément a été conçu pour accompagner esthétiquement les différentes compositions dans un projet de couture, en rendant une image minimaliste et raffinée à la fois.

In sintonia con gli spazi verdi esterni, materiali grezzi per gli elementi architettonici; profili in metallo nero incorniciano ogni stanza e le pareti sono lasciate nella loro finitura cemento.
Le vetrate mettono l'azienda in rapporto con l'esterno, uno stile di vita dinamico ed aperto.

In keeping with the greenery outside, unrefined materials for the architectural elements; black metal profiles frame each room and the walls are left in their cement finish. The glazing allows the company to liaise with the outside, making for a dynamic and open lifestyle.

Als harmonische Ergänzung zu den grünen Außenbereichen dominieren auch architektonisch rohe, unbearbeitete Materialien. Schwarze Metallprofile dienen den Räumen als optische Rahmen, die Wände wurden in schlichtem Sichtbeton belassen. Große Glasflächen setzen das Unternehmen in Bezug zur Außenwelt, vermitteln Dynamik und Offenheit.
